

Spot the Signs of Vision Problems

Vision problems in young children can impact learning, attention, and engagement. Problems seeing in the classroom or playground can look like:

CLUMSINESS

or hesitation with movement

SQUINTING

or covering eyes in bright light

HOLDING OBJECTS

too close or too far away

EYE FATIGUE

during visually demanding tasks

HEAD TILTS

or covering one eye to see

RUBBING EYES

or blinking a lot

Protect their potential.

Note your observations, contact school health staff, talk with your student when appropriate, and contact their parent/guardian.
